

Application Developer

Full Time

Marketing & Experience Division

The Baltimore Museum of Art seeks a full-time application developer to build, maintain, and research and recommend software to fulfill the needs of a variety of public-facing digital applications. We need a hands-on professional who enjoys writing clean code, explaining technical concepts to non-technical colleagues, and working in a space that can encompass everything from ideation to execution. The successful candidate will be a self-starter with extensive LAMP stack experience and a healthy curiosity for new technologies. This position reports to the Chief Innovation Officer (CIO).

Responsibilities

- Oversee technical administration of BMA website, including maintaining development and production environments with version control, and cloud-based server environment.
- Work with designers to transform design comps and prototypes into fully-functional digital tools for a variety of audiences on platforms ranging from websites to mobile apps and in-gallery kiosks.
- Keep abreast of web standards and WCAG guidelines and make recommendations on coding practices the Museum should follow.
- Supports various departments with management of databases, including ones organized using TMS by Gallery Systems, Piction (DAM), and Raiser's Edge, among others.
- Advise on, code, and troubleshoot in-gallery digital experiences.
- Build custom landing pages, donation forms, sign-up forms, campaign and exhibition websites.
- Research new software and advise on purchasing decisions

REQUIREMENTS

- 5+ years' experience working as a web or application developer.
- Demonstrated experience working with a LAMP stack, with JSON, and APIs.
- Demonstrated experience working with PHP package managers like composer
- Working knowledge of javascript libraries such as NodeJs, React and jQuery
- Working experience with javascript frameworks and package managers like GruntJS, NPM

- Eagerness to research and experiment with emerging technologies for both online and physical experiences and how they might be applied in a Museum setting
- Understanding of best practices for building secure webpages and working with third-party platforms for managing donations, memberships, ticket purchases, etc.
- High level of professionalism, integrity, and good judgment
- Highly skilled at working with open source content management systems, and familiar with the pros and cons of working with each of the major platforms (WordPress, Drupal, etc.)
- Familiarity with Microsoft SQL servers, Stripe Payment API and SendGrid API a plus

The BMA is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, or any other characteristic protected by law. We are committed to building a culturally diverse staff and strongly encourage all qualified professionals to apply.

We offer a competitive salary and a generous benefits package. For this exempt position we offer medical, dental, vision, prescription, 403b retirement plan, long term disability, flexible spending account, flexible and condensed scheduling, museum and restaurant discounts, and reduced fee gym membership. We also offer accrued vacation, holidays, personal days, floating holidays, and sick days.

Apply:

Please send cover letter and resume to HR@artbma.org with "Application Developer" and your first and last name in the subject line.

Incomplete application materials will not be accepted.

No phone calls please.

Position will be posted until filled.
